

# Cell-F Center Newsette

THE GOOD OF THE ONE IS THE GOOD OF THE ALL  
- Another

September 18, 1989

Vol. 1, No. 1

## Self Evident Truth

**It** is extremely fitting that the first issue, Volume I, Number 1, of the *Cell-F Center Newsette* has its inception in the month of September. For it was the 18th September 1895, 94 years ago, when Daniel David Palmer delivered his first chiropractic thrust to Harvey Lillard.

**How** did D.D. become aware of chiropractic? If we carefully read a few of his passages in his two books, *The Adjustor*, and *The Chiropractor*, we realize that chiropractic was given to him by "another" from (as he called it) the "spirit world."

**Why** did D.D. hide his "discovery" of chiropractic behind such a dark veil? Was he being careful not to offend the scientific community? Science scoffs at spirituality, inner dimension, etc. We can only speculate.

**Cell-F** Center wishes to construct a chiropractic philosophy based upon facts. The Chiropractic philosophy must start with a self-evident truth - a truth that can not be denied or rejected by anyone. Of course, D.D. Palmer gave us the statement "The

basic principle of chiropractic is tone," and B.J. Palmer gave us "innate intelligence" as the basic principle. Is innate the basic principle of chiropractic, or is there something more basic than tone and innate?

We at Cell-F Center are hoping to soon establish such a self-evident truth. As we know, a self-evident truth needs no proof. It just is. Such a truth will be not only for chiropractic, but also for every person who wants a foundation upon which he or she can think. Remember, the thoughts of today may not be the thoughts of tomorrow. Thoughts of today are stepping stones to reach the thoughts of tomorrow, and those thoughts will one day become the ultimate truth.

**It** is my intense belief that chiropractic was given to us not only to assist sick people, but also to help stop mankind from becoming extinct - going the way of the dinosaurs.

- Pasquale Cerasoli,  
Chiropractor
